

WEB PIN SET

- To set the PIN code on the newly ordered card, a customer needs to go to the web page https://reg.azericard.com/pin_rsp/, and enter the card's 16-digit PAN number, CVV and card expiry date and click OK.

The screenshot shows the 'Bank Respublika' website interface. The header includes the bank's name and the slogan 'sizə faydalı'. The main content area is titled 'PİN kodun təyin edilməsi' (PIN code setting). It contains a form with the following fields: 'Kart' (Card) with the value '5235224444695393', 'Bitmə tarixi' (Expiry date) with '09' and '22' in separate boxes followed by 'MM/YY', and 'CVC2' with the value '771'. Below these fields is a radio button labeled 'PİN kodu özüm yaratmaq istəyirəm' (I want to create my own PIN code), which is selected. At the bottom of the form are two buttons: 'EN' and 'OK'.

- To set the PIN code, the sequence of numbers is sent via SMS to the cardholder's phone number.

- The customer enters the sequence of numbers filled in by entering the PIN code instead of asterisks on the same page and clicks OK.

PİN kodun təyin edilməsi

PİN kodu təyin etmək üçün rəqəm sırası Sizin telefon nömrənizə göndərildi: 994503215952

Geri

OK

- The customer receives an SMS about the successful operation.
- To use the PIN code set with the WEB, in POS-terminal transactions, the PIN code must first be activated through the ATM. For this, it is enough to carry out any operation (to check balance or cash out) at any ATM.
